

Course Summary

The Green Heat Transfer Method: Radiant Heating and Cooling

Date: Thursday, May 13, 2010

Time: 9:30 - 12:30

Location: WOW Hotels Topkapi Palace in Antalya, Turkey

Find out how radiant heat transfer affects energy consumption, occupant thermal comfort, building material selection, and HVAC equipment design and sizing. Optimize your work in green building design by discovering why the interrelated system of radiant heat transfer is well understood, but only now emerging as the key to green building thermal performance.
